

# JHON LAY LOPEZ

jhonlaylopez.2003@gmail.com | linkedin.com/in/jhon-lay-lopez | github.com/Lopez-JhonLay

## PROFESSIONAL SUMMARY

---

Full Stack Developer experienced in web applications, backend APIs, analytics dashboards, cloud reporting, and application security using TypeScript, Next.js, NestJS, PostgreSQL, BigQuery, and Cloudflare.

## TECHNICAL SKILLS

---

**Frontend:** TypeScript, JavaScript, React, Next.js, Vue.js, Material UI, Tailwind CSS

**Backend:** Node.js, NestJS, REST APIs, Cloudflare Workers

**Databases & Data:** PostgreSQL, Cloudflare D1, BigQuery

**Cloud & DevOps:** Google Cloud Platform, Cloudflare, GitHub Actions

**Testing & Tools:** Playwright, Git, GitHub, OAuth, JWT

## EXPERIENCE

---

### Application Developer

DFNN Inc.

September 2025 - Present

*BGC, Taguig City*

- Built and maintained full-stack LottoMatik features, connecting frontend workflows with backend APIs, databases, and external services.
- Automated agent sales and lottery reporting with BigQuery and GCP, including commission, DST, withholding, and net-due calculations.
- Implemented authenticated API access and OTP retry limits with temporary lockouts to strengthen application security.
- Developed Lotto Broker workflows for ticket management, prize claiming, KYC-aware actions, and draw information.

### Frontend Developer Intern

DigiPlus Interactive Corp.

March 2025 - June 2025

*BGC, Taguig City*

- Developed responsive web interfaces using Vue.js, Element Plus, Pinia, and JavaScript.
- Built reusable UI components and integrated frontend workflows with APIs.
- Implemented state management and responsive layouts across multiple application screens.

## PROJECTS

---

### KGI Back-Office System

Casino gaming back-office system | Next.js, NestJS, PostgreSQL

- Built full-stack features for game management, provider filtering, and analytics workflows.
- Developed API-driven dashboards for player registration, gross bets, top games, and unique-player metrics by brand.
- Implemented dynamic game and provider management with brand-based status controls and backend-integrated data.

### Lotto Broker

Full-stack web application | Next.js, NestJS, PostgreSQL

- Developed paginated, API-driven views for active, historical, and winning tickets with loading states.
- Implemented KYC-aware prize-claiming workflows with pickup and bank-claim interfaces.
- Integrated draw schedules, results, QR ticket display, and LottoMatik APIs into the betting experience.

### LottoMatik Marketing Website

Next.js, Material UI, Google Maps API

- Developed and maintained responsive public pages and interactive features.
- Enhanced the Agent Locator with Google Maps, location search, filtering, and API-driven agent data.

## EDUCATION

---

### Bachelor of Science in Information Technology

Polytechnic University of the Philippines

2021 - 2025

*Taguig Branch*
